

MINERALS

Today, the food available to us does not provide us with the correct balance of all the minerals the body requires on a daily basis. Indeed, *in 1991 a Report by the Ministry of Agriculture, Fisheries and Food expressed their concern for the health of the people of this country* because of this shortage in our food and suggested that an answer was daily supplementation in liquid form.

The problem is that most of the fruit and vegetables we consume are produced by mass farming methods and the soils, which were once rich in mineral constituents, have now been reworked so many times that the crops are now lacking in these important elements.

Mineral Solutions by Modere is specifically formulated to deal with this problem.

It also supplies necessary vitamins, amino acids, anti-oxidants etc. in a liquid form, instantly absorbed by the body. You can actually take it when you are too ill to eat!

Mineral Solutions are VAT free because they are classed by the Government as FOOD.
